2. FUNCTIONAL DEEP DIVE BY INVESTMENT STRATEGY

A. Strategy 1: Cross-Border Restructuring & SEC Section 3(a)(10) Recognition

Under **Section 3(a)(10) of the US Securities Act of 1933**, shares issued in exchange for outstanding creditor claims or debt securities are exempt from registration if approved following a formal fairness hearing by an authorized judicial body. In the UK, **Part 26 Schemes** and **Part 26A Restructuring Plans** (*CIGA 2020*) sanctioned by the High Court of Justice in London hold decades of formal SEC No-Action precedent. In Australia, **Part 5.1 s411 Schemes** and **Part 5.3A DOCAs** fulfill the exact same fairness standard before Supreme and Federal Courts. In Germany, **StaRUG** and **§ 225a InsO Insolvency Plans** provide binding cross-class cram down (*Debt-to-Equity*) mechanisms recognized across European and US cross-border capital structures.

B. Strategy 2: Delisted & Suspended Entities CRM (Reverse Takeovers & Removal Clocks)

Shell companies and suspended vehicles represent prime targets for non-dilutive backdoor listings (RTOs). On the **London Stock Exchange (AIM)**, companies disposing of operations are classified as **AIM Rule 15 Cash Shells** and must complete an RTO within **6 months** or face trading suspension and cancellation under **AIM Rule 41**. On the **ASX**, **Listing Rule 17.12** establishes a strict **2-year automatic removal countdown clock** from suspension. In **Frankfurt**, clean German AG vehicles (*Börsenmäntel*) offer expedited quotation access across the *Freiverkehr* (Basic Board and Scale) segments.

C. Strategy 3: Balance Sheet Distress Screener & Capital Outreach

Statutory distress triggers alert investors to urgent liquidity needs prior to formal insolvency:

- **UK Section 656 Companies Act 2006:** When a public company's net assets fall to 50% of called-up share capital, directors are legally obligated to convene an EGM within 28 days to consider emergency recapitalization.
- **German § 92 AktG:** Management (*Vorstand*) must immediately convene an Extraordinary General Meeting the moment half the share capital is lost.
- **Australian Appendix 5B/4C Item 8.6:** Exploration and technology companies reporting < 2.0 quarters of cash runway must formally detail their capital raising plans to the ASX.

D. Strategy 4: Insider Signal Scouting, Major Holdings & Dilution Radars

Tracking high-conviction insider buying alongside major institutional accumulations:

- **Director Dealings:** UK MAR Article 19 (PDMRs), Australian Appendix 3Y, and German EU MAR Article 19 require open-market trades by board members to be disclosed within 3 to 5 business days.
- **Substantial Shareholder Infiltration:** UK TR-1 and German WpHG mandate disclosures starting at 3% (and every 1% increment thereafter in the UK), while Australia's Form 603 triggers at 5%.
- **Dilution Radar:** Monitors annual statutory pre-emption rights disapplication authorities (UK Section 570 CA 2006, ASX LR 7.1/7.1A 15%+10% placement capacity, and German § 186 AktG 10% non-pre-emptive placement limits).
